

— AI VOICE AGENTS FOR GROWING BUSINESSES

A phone employee for businesses built on Replit

Help founders answer calls and get work done,
with the phone lines and business systems they already use.

 A SHARED AUDIENCE

The app is built. The business still needs to answer.

Replit helps small businesses build CRMs, customer portals, and scheduling tools.

PhoneIQ helps those businesses serve the person calling.

Our proposed audience is founders whose businesses depend on phone calls, but who are not ready to hire a sales or support team.

They need someone to answer questions, handle requests, and take the next step.

A focused offer for Replit builders with a real phone workflow: bookings, orders, customer service, or maintenance.

CALLS BECOME COMPLETED WORK

Answer the call. Act in the business's systems.

01 / CONNECT

The existing phone line

Customers call the business as usual. PhoneIQ connects to the line they already use.

✓ **Keep the phone line**

Connections and actions are configured and tested for each business.

02 / UNDERSTAND

A configured voice agent

The agent uses the business's information, services, and rules to handle the request.

✓ **Keep the business software**

03 / DO THE TASK

The existing business tools

Book an appointment, capture an order, or create a work order through connected systems.

 ONE CALL, A USEFUL OUTCOME

A customer calls. An appointment gets booked.

"Can I book a haircut for
Thursday afternoon?"

ILLUSTRATIVE CUSTOMER REQUEST

- 01 Understand the service and preferred time.
- 02 Check availability in the connected calendar.
- 03 Offer a relevant additional service.
- 04 Confirm the choice and book the appointment.

The booking is in the system the salon uses.

Illustrative workflow, configured around the salon's booking system and service rules.

DIFFERENT BUSINESSES, EVERYDAY CALLS

Useful wherever a call starts a piece of work

Restaurants

Take food and catering orders, make reservations, and capture complaints for the right follow-up.

Hair salons

Book appointments, offer additional services, and answer questions about hours and availability.

Property managers

Create tenant work orders and make outbound calls to vendors to coordinate repairs.

Each workflow uses the business's connected systems and agreed handoff rules.

A STRAIGHTFORWARD WAY TO START

Offer PhoneIQ to builders through a referral partnership

Replit introduces

Make PhoneIQ available as an option for builders who need calls answered and tasks handled for their businesses.

PhoneIQ delivers

Work with each referred business to configure the agent, connect its tools and phone line, test the workflow, and support the service.

Preferential pricing for referred Replit builders

Pricing and referral terms to be agreed together.

GIVE THE IDEA A FOCUSED TEST

Start with a few businesses. See what the calls accomplish.

-
- | | | |
|----|----------------------------------|--|
| 01 | Choose the first builders | Find businesses with active phone demand and one clear workflow worth handling. |
| 02 | Connect and launch | PhoneIQ sets up the line, information, system connections, and handoff rules. |
| 03 | Review the outcomes | Look at calls handled, tasks completed, exceptions, and founder feedback before expanding. |
-

 A CONVERSATION WORTH HAVING

Help founders build. Help them answer.

Replit helps founders create the software behind their businesses.
PhoneIQ can give them a phone employee who answers calls and gets work done.

OUR ASK

Let's explore a referral pilot for Replit builders who need an affordable way to serve customers by phone.
